

Ethical Naturism Commercial Naturism

*Report to be presented by Gianfranco Ribolzi,
President of the Italian Naturist Federation
(FENAIT) to the delegates at the 32nd World
Congress*

Excerpts from the report:

*"We understand and still consider valid the definition of
Naturism codified at the Agde Convention in 1974"*

*"Nudism is a practice that necessarily falls within the
naturist orbit because naturism is its fundamental
principle."*

*"Naturism must be practicable and accessible to the
greatest possible number of people, and this may even
involve "giving in to" the demand for the comforts that
are needed to live better;"*

*"we must acknowledge that the serious economic crisis
we are currently undergoing also affects the type of
naturism practiced and we have no choice but to accept
"consumerist" naturism as part of its evolution."*
